

What about data literacy? Business librarians and the ACRL Framework for Information Literacy

Dr. Patricia Condon
Wendy Pothier

INCONECSS 2022 - International Conference on Economics and Business Information
May 2022

University of
New Hampshire

Introduction

Dr. Patricia Condon

Assistant Professor, Research Data Services
Librarian

Wendy Pothier

Associate Professor, Business & Economics
Librarian

University of New Hampshire

Agenda

- Context for Business Data Literacy Competencies
- Mapping the Competencies to ACRL Framework
- Summary & Future Direction
- Q&A Discussion

| Business data literacy competencies (Pothier & Condon, 2019) | Description of business data literacy competency |
|---|--|
| 1. Data organization and storage | focuses on foundational data management practices |
| 2. Understanding data used in business contexts | involves identifying sources or potential sources of data and thinking critically about the use of the data. |
| 3. Evaluating the quality of data sources | involves critically evaluating how data was generated, who created or generated it, and how is it being analyzed and interpreted. |
| 4. Interpreting data | highlights the importance of knowledgably decoding data in order to apply findings effectively. |
| 5. Data-driven decision making | emphasizes the data has the power to effect change by enabling decision makers to make deliberate and informed choices. |
| 6. Communicating and presenting effectively with data | “is about extracting a meaningful and cogent narrative from the data” (Pothier & Condon, 2020). |
| 7. Data ethics and security | embodies the “responsibility to approach collection, interpretation, use, and security of data ethically and with integrity” (Pothier & Condon, 2019). |

Business Data Literacy Competencies

Data Literacy & the Framework

- Establish connections between competencies and foundational documents
- Move competencies into practice
- Emphasize data literacy in library instruction
- Strengthen voice of business librarians as key stakeholders

The Mapping

Business data literacy competencies

Understanding data used in business contexts

Evaluating the quality of data sources

maps to

ACRL information literacy frame

Authority is constructed and contextual

Business data literacy competencies

Data organization and storage

maps to

ACRL information literacy frame

Information creation as process

Business data literacy competencies

Understanding data used in business contexts

Data-driven decision making

Data ethics and security

maps to

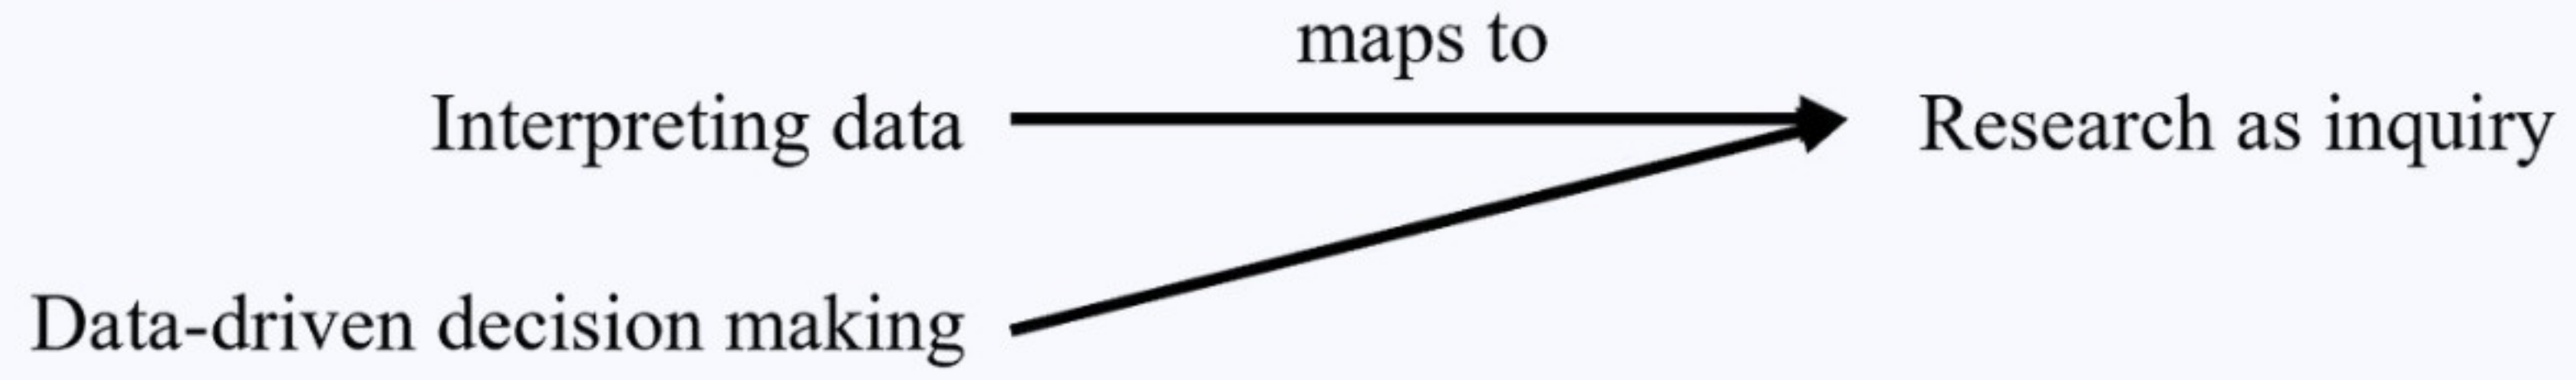

ACRL information literacy frame

Information has value

Business data literacy competencies

ACRL information literacy frame

Business data literacy competencies

Evaluating the quality of data sources

Communicating and presenting effectively with data

maps to

ACRL information literacy frame

Scholarship as conversation

Business data literacy competencies

Data organization and storage

Understanding data used in business contexts

maps to

ACRL information literacy frame

Searching as strategic exploration

Summary and Future Directions

- Identifies baseline business data literacy competencies for students.
- Bridges intersection on foundational Framework, business librarianship, and data literacy
- Introduces strategies to integrate data literacy into library instruction for business & economics
- Future research: Explore relevancy of business data literacy competencies to the workforce
