What recommendations do you have?
How would you mitigate resistance?

The Strategic Aim

" In 2025, the university library will produce a guide and **support skills development** on how to **implement FAIRbyDesign workflows** in the development of teaching materials and **outreach on Open Science**, targeted at researchers and made available as **open educational resources** (OER). The aim is to **foster a FAIR culture** in the creation of open educational resources that promotes **recognition, reuse, and sharing of learning materials**."

The University Libraries operational plan for 2025

The FAIR Principles in an OER Context

Choosing LearningLib

The Royal Library is a stakeholder, which adds credibility and support to the initiative.

It is a platform where we have influence, allowing us to shape its development and features according to our needs.

We can contribute to making it a suitable platform for creating FAIR by Design learning resources, ensuring that the resources are findable, accessible, interoperable, and reusable.

Survey Design

Quality Assessment

Evaluation of the LearningLib platform, structured around 16 assessment checklists.

Accessibility & FAIR-by-Design Evaluation.

Workshops

Two One-Day Workshops: 24 participants
Participants colleagues from teaching and research support roles.

Preparatory Survey:
Baseline data on participants' digital literacy and prior experience.

Observations

Workshop 1:
Applied story-share and capture techniques to surface personal experiences and usage narratives.

Workshop 2: Open observation with whiteboards

Sparring

Sparring with the LL network

Presentation of collected data

Shared our result with the consortium

Overview of the project and its key outputs

Survey

Three themes: teaching practices and OER development, familiarity with LearningLib, perceived strengths and weaknesses of the platform.

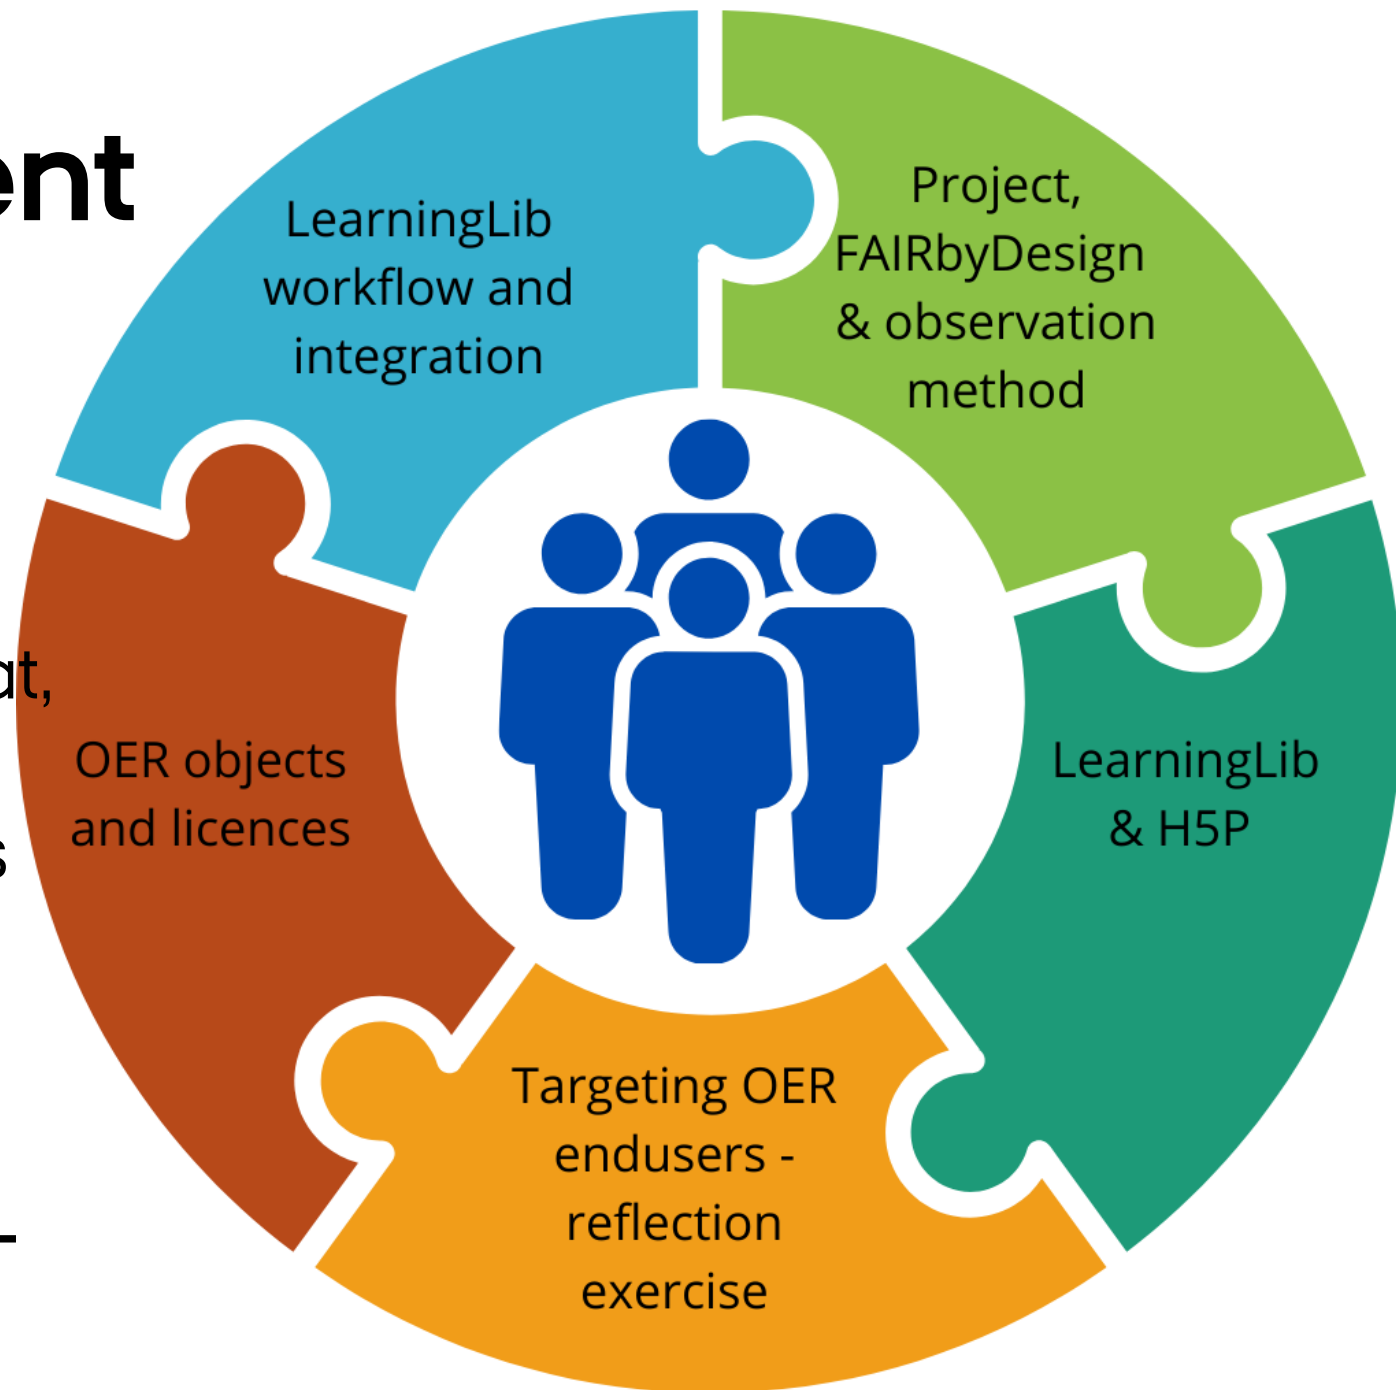

24 questions, approximately 30–45 minutes to complete.

Results from 37 responses

Workshop content

- Collection of experiences
- Interaction with LL
- Response to workshop format, design & content
- Frustrations & Aha! moments

Aha! moments

With H5P I can make learning objects that can be reused on different subject guides and used to answer common questions!

LearningLib is a help, because it helps me simplify the content

Frustrations

It takes a long time to learn how to use LL, it is not intuitive at all – particularly when you compare to other tools we use

Difficult to judge which license should be given - to an element in a learning object or the whole object?

Findings from the

 **creative
commons**

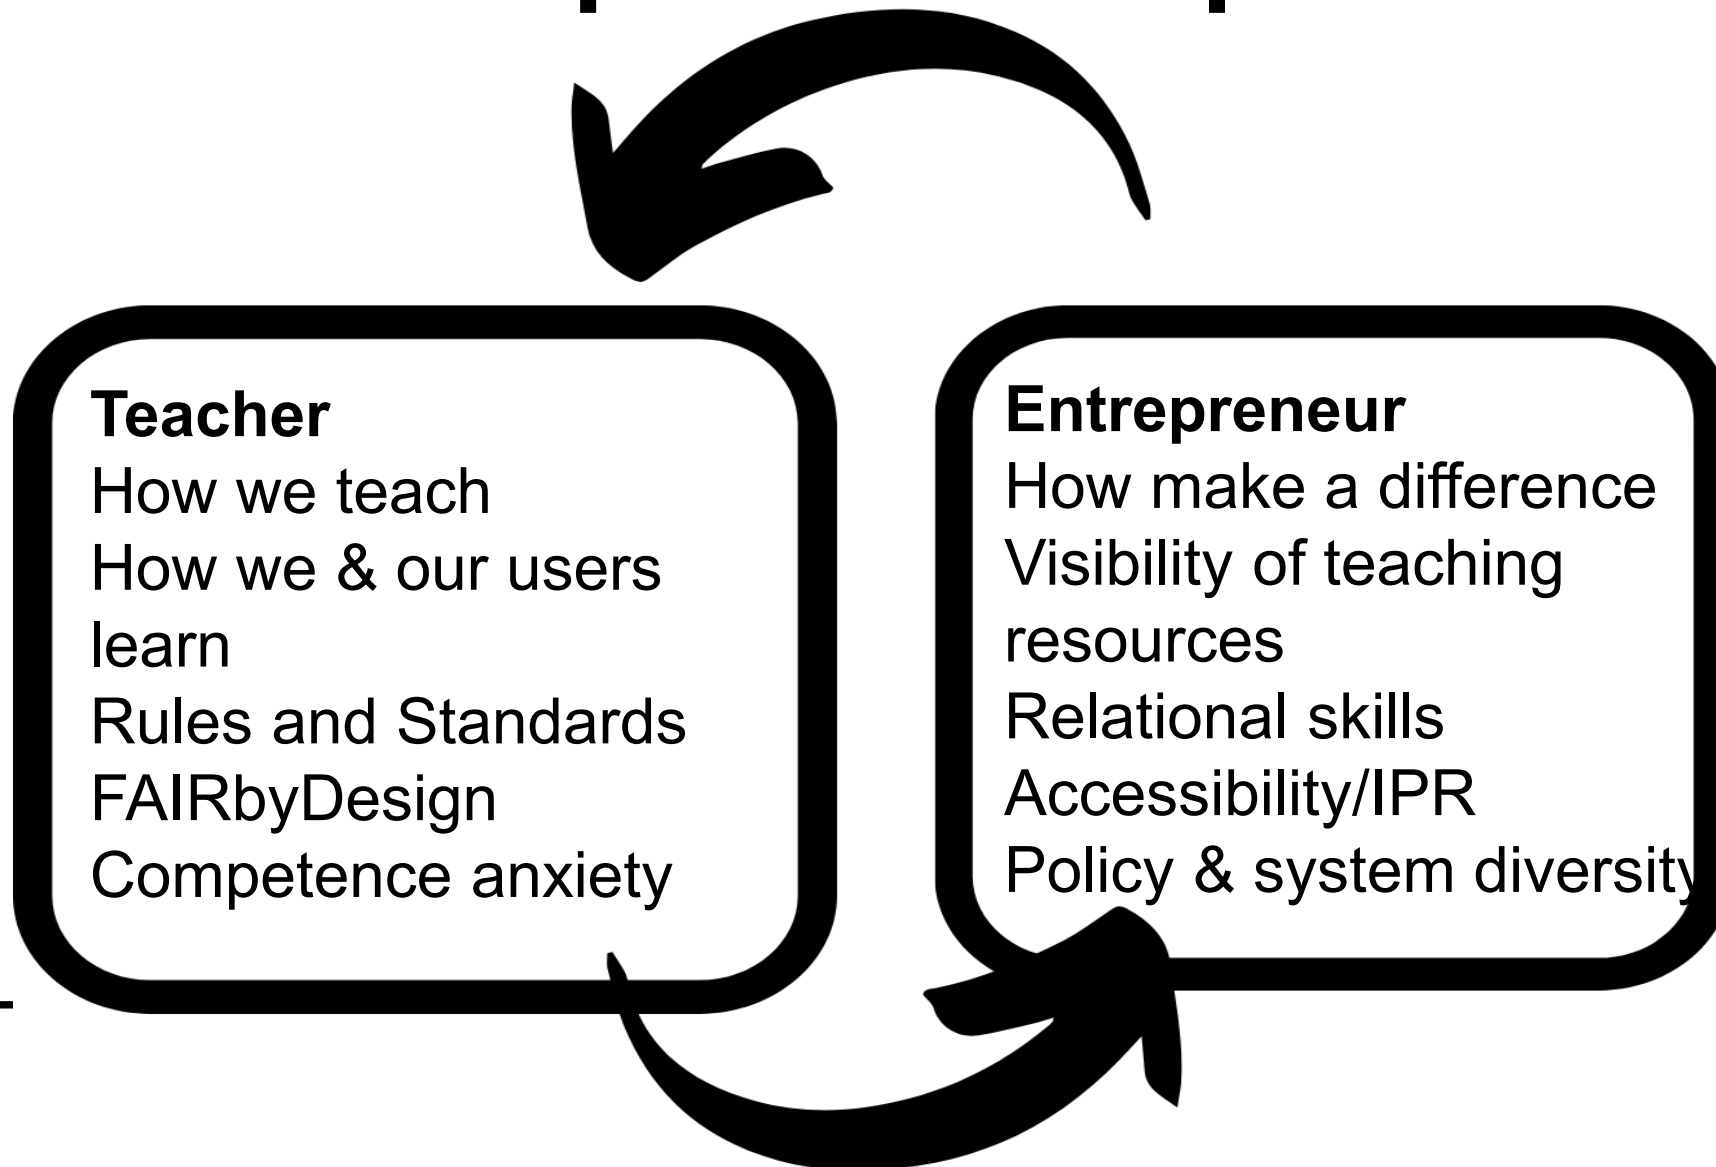

- Development of LL
- Skills in OER & LL
- More workshops with real-life examples
- Instructional skills
- Computational thinking

Building a FAIR OER culture

- ✓ Organisational support
- ✓ Collaboration around platform development
- ✓ Teacher entrepreneurship & competence development

Teacher entrepreneurship

Conclusion & next steps

- Get started creating an open & FAIR culture across KB
- Boost collaboration with university researchers in creating OER content
- Community building nationally/in the nordic countries
