# The aim of LearningLib.org

*The goal of LearningLib is to create an online community among subject, research, and education libraries in the Nordic region, where knowledge sharing and the development of teaching are the main focus.*

*LearningLib.org is working for the development, storage, dissemination, and sharing of open Nordic library-produced learning resources.*

LEARNINGLIB

# LearningLib.org as Open Educational Resource (OER)

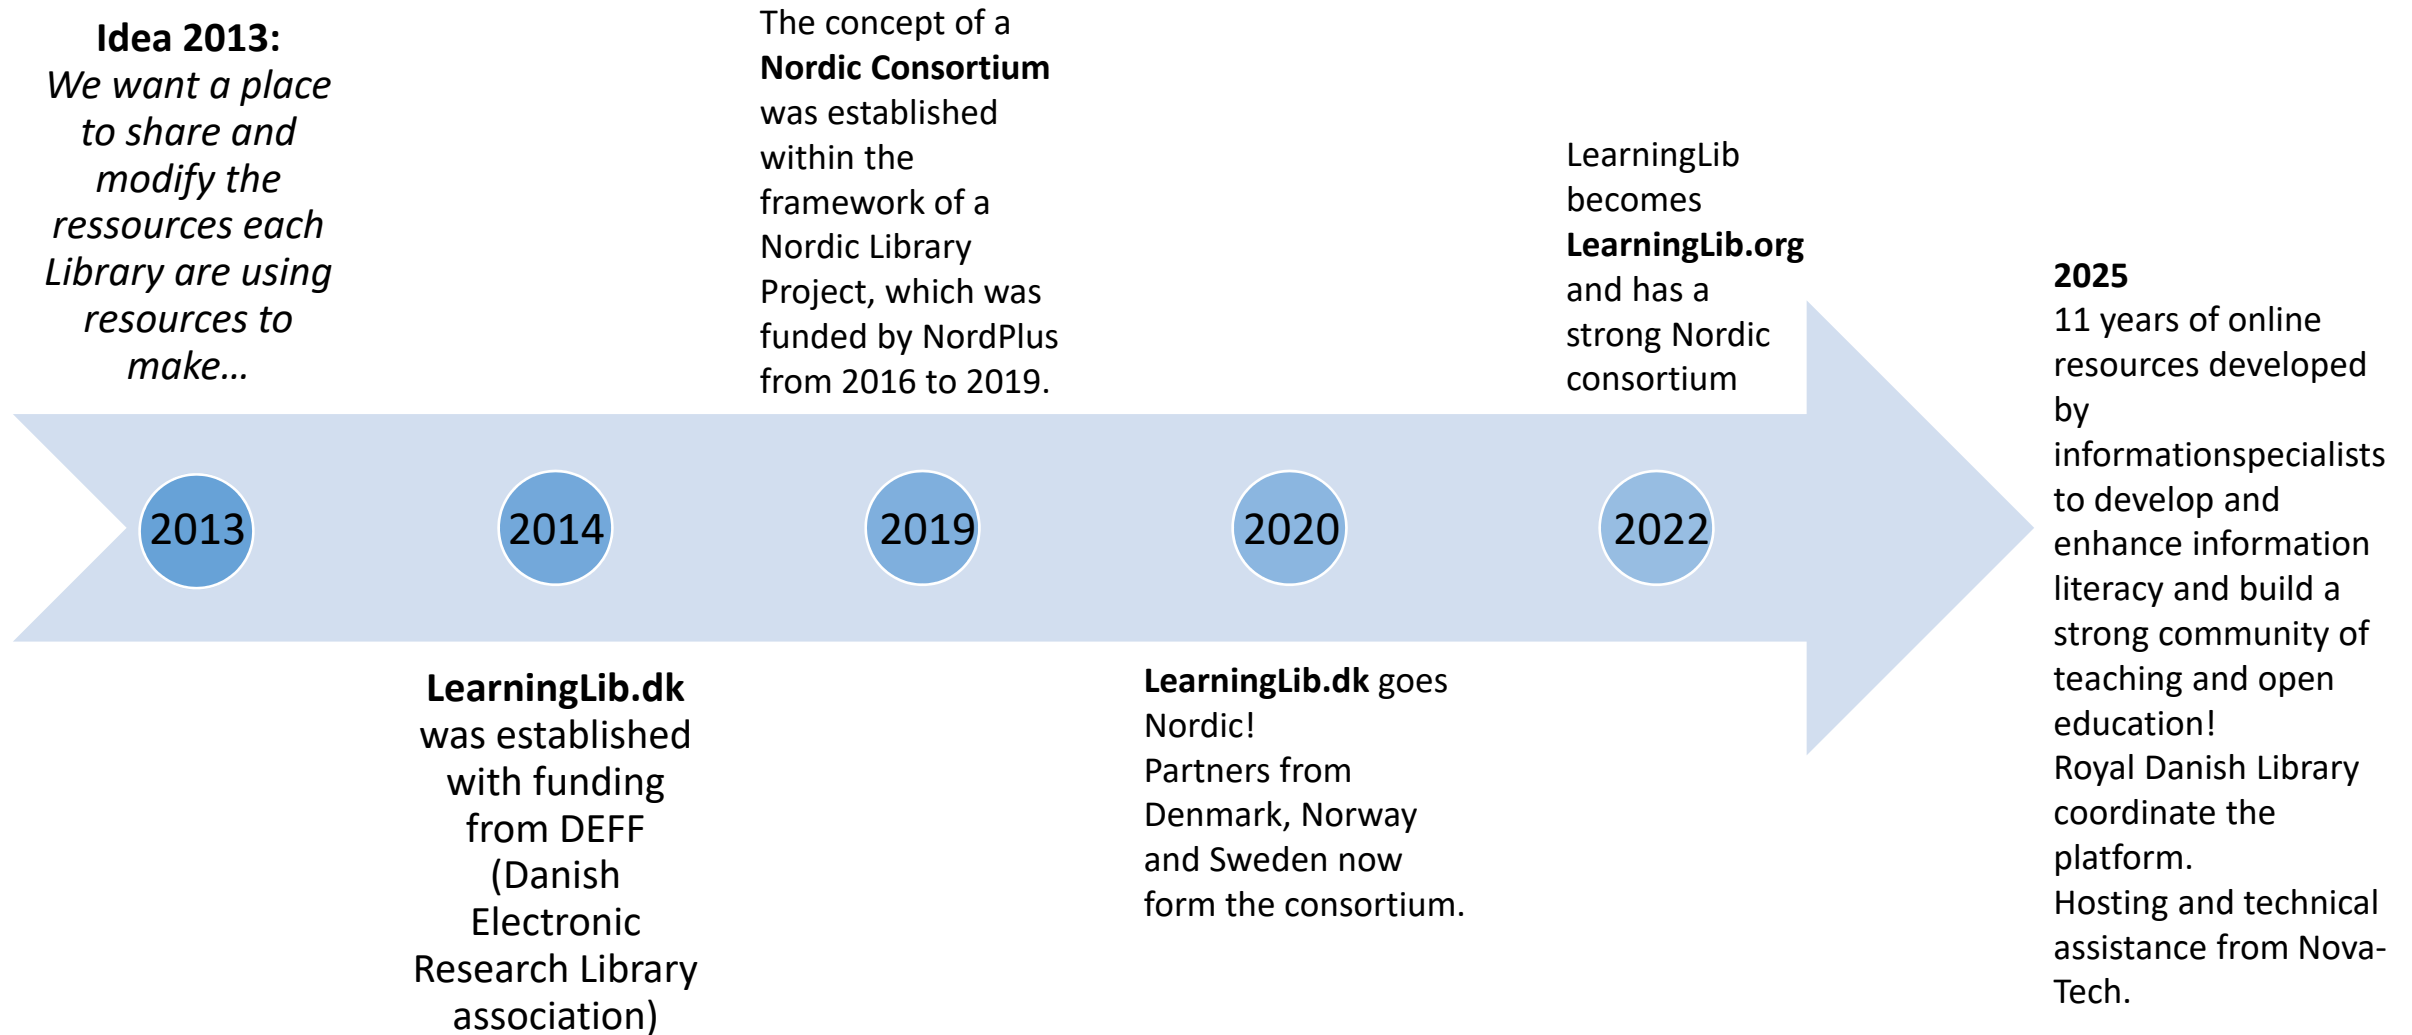

LearningLib.org support Open Science and is an Open Educational Resource (OER) as defined by UNESCO:

*“Open Educational Resources (OER) are learning, teaching and research materials in any format and medium that reside in the public domain or are under copyright that have been released under an open license, that permit no-cost access, re-use, re-purpose, adaptation and redistribution by others.”*

(UNESCO (2019). *Recommendation on Open Educational Resources (OER)*. Verified 08052025: <https://www.unesco.org/en/legal-affairs/recommendation-open-educational-resources-oer?hub=785> Page 5.)

# LearningLib.org

LearningLib.org display various learning resources developed by librarians and informationspecialists.

*This strong emphasis on information literacy and libraries is what makes LearningLib.org unique.*

Every year the platform develops with new functions or tools to enhance user experience and to make it more flexible to publish resources.

LearningLib.org have a major focus on Creative Commons Licenses and requirements of OER these years (Discover more: [Open Educational Resources at the Royal Danish Library](#))

The consortium is open to more collaborators.

LEARNINGLIB

# LearningLib.org

A primary focus of LearningLib.org has been to transform the culture of sharing teaching materials and resources from a closed system to an open one.

The consortium and network surrounding LearningLib.org have served as ambassadors for this initiative.

Each year, content is reviewed, and creators are contacted if any resources need to be updated.

A more thorough peer review process for resources is being considered as the platform grows.

# LearningLib.org: Content

LearningLib.org is build in Wordpress and with an integration to H5P.

H5P gives the user a lot of opportunity to make interactive elements.

Learning resources are published as soon as the creator believes they are ready. This makes the use flexible.

Find resources such as quizzes on copyright, videos on how to search for legal documents, steps for conducting a systematic review, a paper fortune teller about Generative AI etc.

*LearningLib.org is a place to share with colleagues and to be inspired. Take a look!*

# LearningLib.org – how to proceed?

How can we better reward the work with open educational resources? Is it a responsibility for library leaders or the research community at large?

We have an open platform for sharing, reuse, and learning—how can we encourage information specialists to utilize it more in their daily work?

Please give us your opinion  
<https://padlet.com/aulibrary1/learninglib>

# LearningLib.org – please get in touch!
