SYSTEMATIC REVIEWS

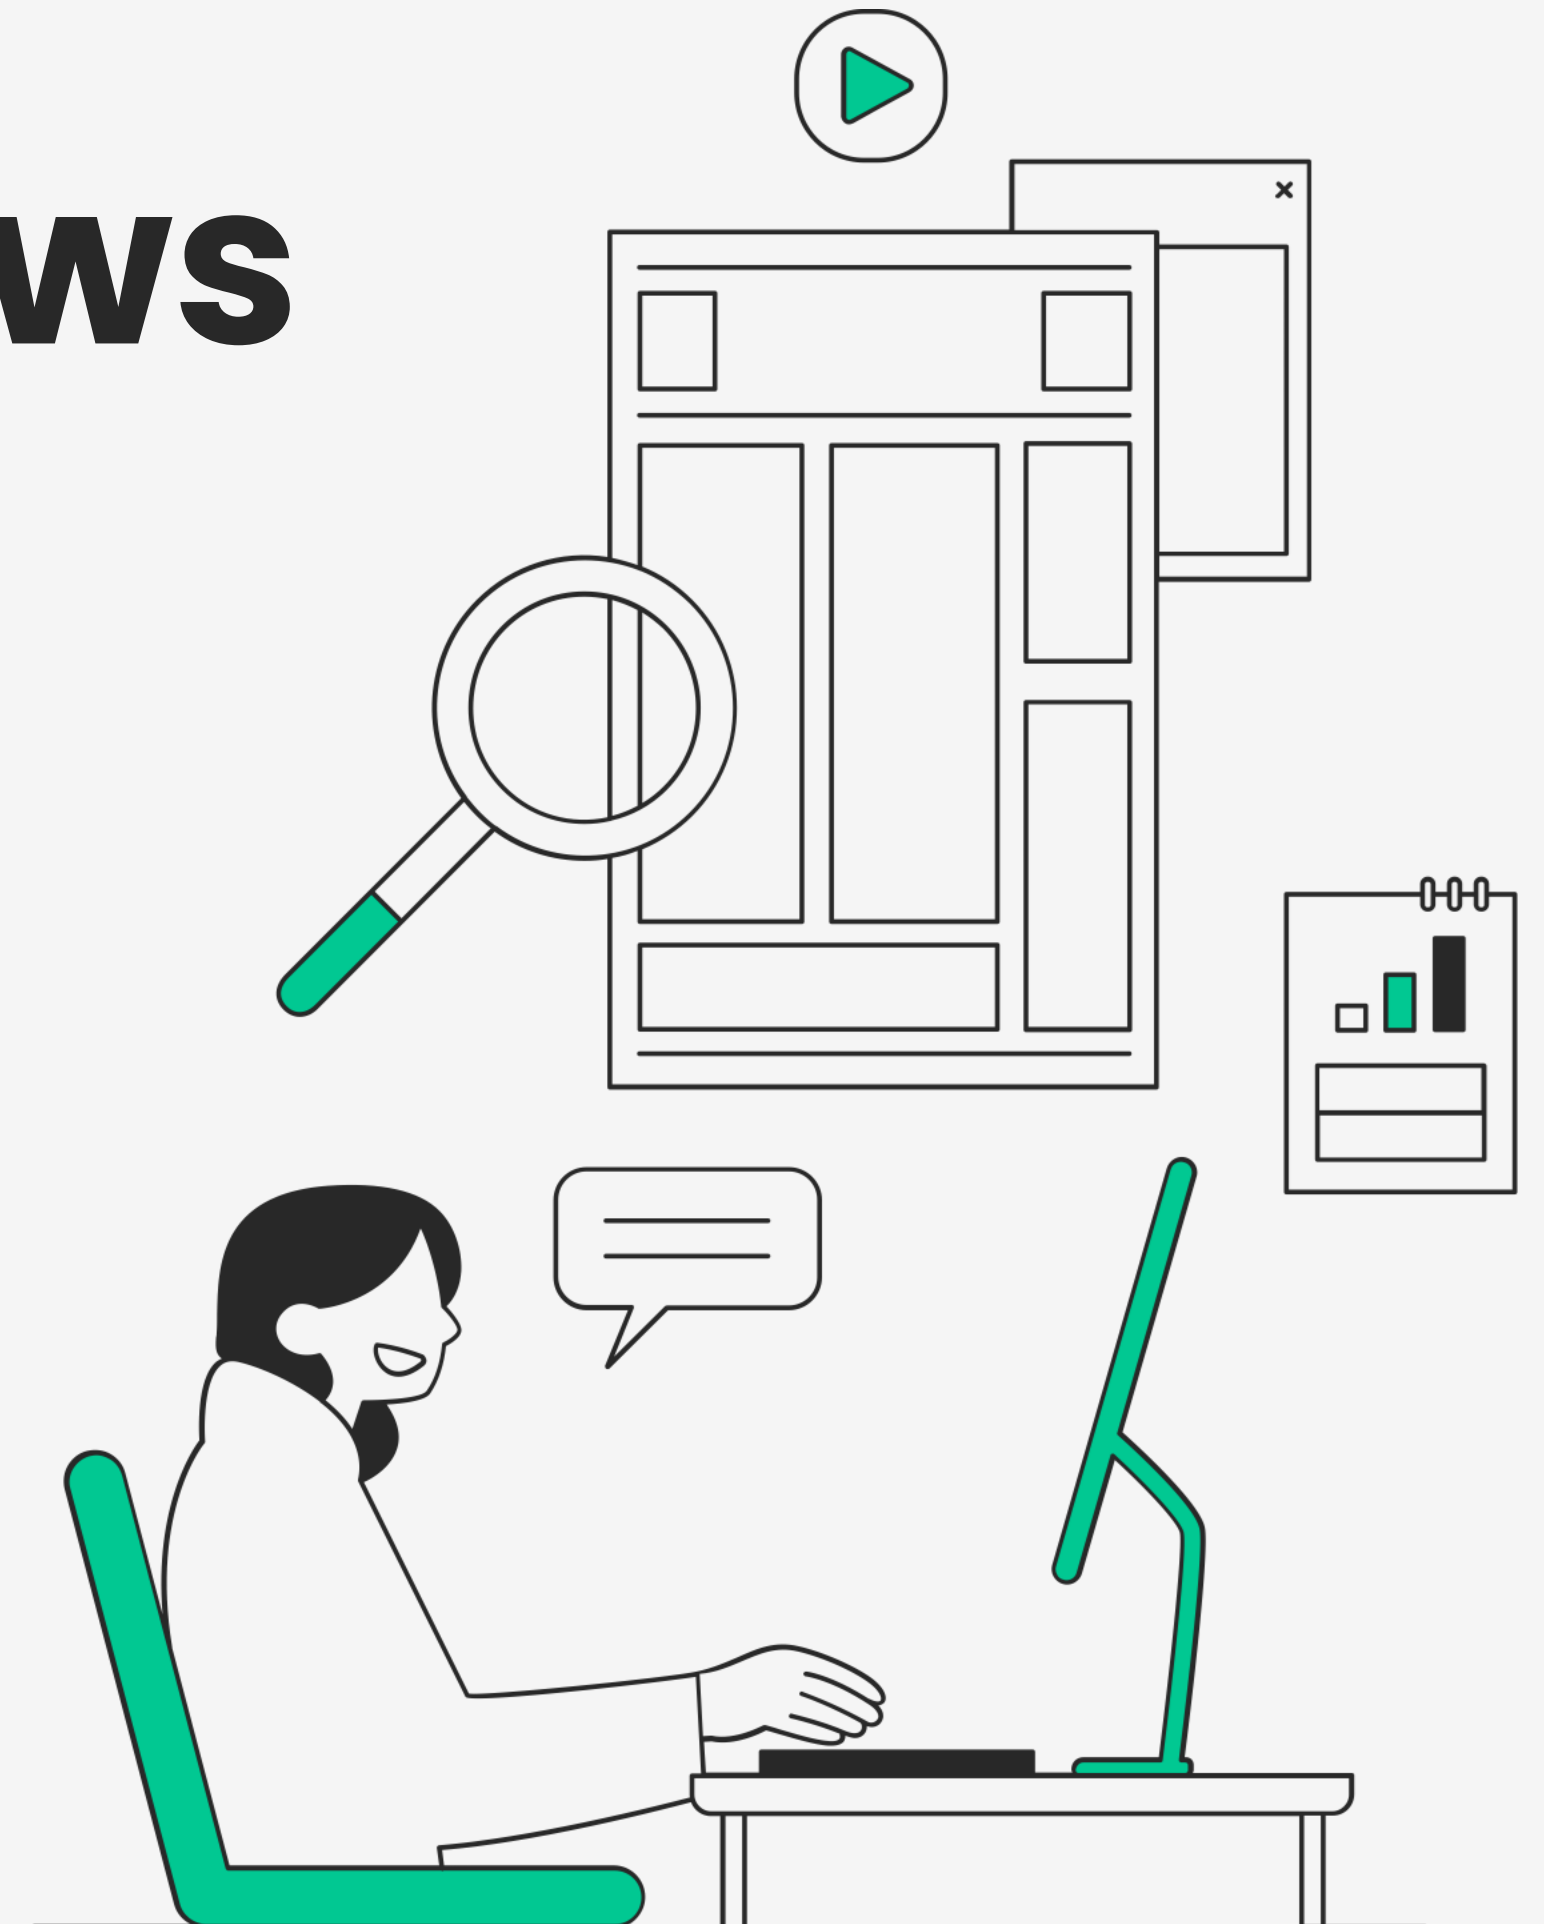

Systematic reviews

A systematic review attempts to gather all the empirical evidence that fits pre-specified eligibility criteria to answer a specific research question.

It uses explicit, systematic methods that are selected with a view to minimizing bias, thus providing more reliable findings from which conclusions can be drawn and decisions made.

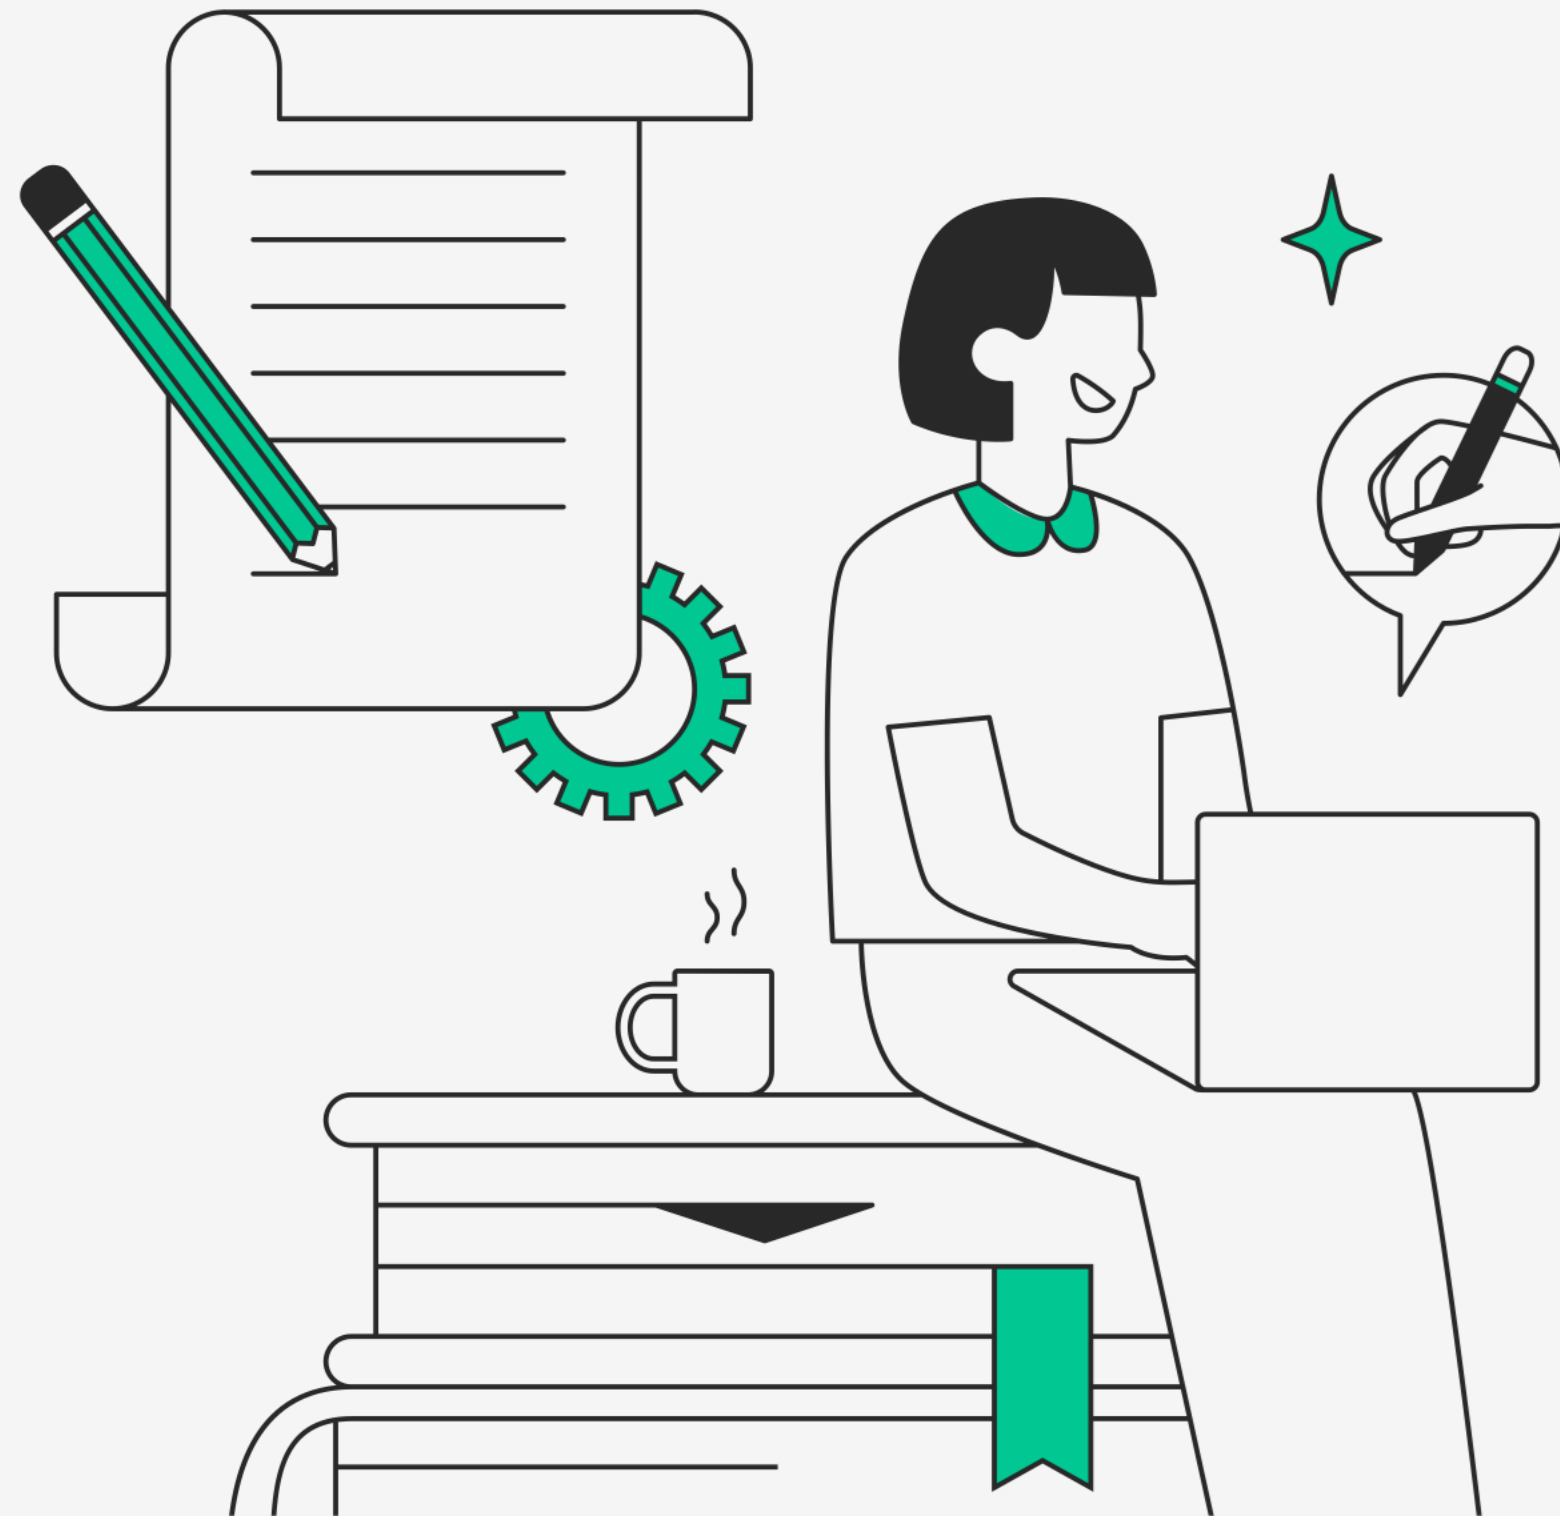

Source: Cochrane Collaboration. (2019). Cochrane handbook for systematic reviews interventions.

A stylized illustration of a person with dark hair, wearing a white shirt with a red collar and a red backpack, shouting into a red and white megaphone. The person's right arm is raised in a 'V' sign. The background is a large yellow shape. To the left is a white rectangular interface element with a speech bubble icon, a hashtag symbol, and a bookmark icon. Above the person's head is a speech bubble containing a person icon, '3K', a heart icon, and '500'. Below the person's right arm is a red circular icon with a white thumbs-up symbol. At the bottom right is a white rectangular icon with a red play button and a white pause button. At the bottom left is a red star icon. In the center bottom is a red circular icon with a white envelope symbol and the number '154'. The word 'LIVE' is written in black text next to a red dot.
